

NEWS RELEASE – FOR IMMEDIATE RELEASE

Comparison Data on Wilks Biofuels Blend Analyzers Conducted by Independent Laboratories

East Norwalk, CT, May 12, 2010 – Wilks Enterprise is pleased to announce the availability of comparison data, done by independent laboratories, on its InfraCal Ethanol and Biodiesel Blend Analyzers and InfraSpec VFA-IR Spectrometer.

The InfraCal Ethanol Blend Analyzer was tested against an Oxygenate Flame Ionization Detector (O-FID) with comparable results. The InfraCal Biodiesel (FAME) Blend Analyzer and InfraSpec VFA-IR Spectrometer were compared to an FT-IR using EN 14078 and ASTM 7371 methods. In all tests, the results obtained with the Wilks instruments were at least equal, if not better.

This data indicates that the InfraCal Ethanol and Biodiesel Blend Analyzers, as well as the InfraSpec VFA-IR Spectrometer, do provide results comparable to EN 14078 and ASTM 7371 methods. However, they provide a significant advantage in that they are rugged, portable, easy-to-use instruments that provide measurement data in less than one minute. They are ideal for on-site use in laboratories, production facilities or distribution centers.

To obtain a copy of this Biofuels Blend Comparison Data, please contact: Wilks Enterprise, Inc., 25 Van Zant Street Ste. 8F, E. Norwalk, CT 06855, TEL: 203-855-9136; FAX: 203-838-9868, Email: info@wilksir.com. A copy of the comparison data can be downloaded from the Wilks Enterprise website - www.WilksIR.com.

About Wilks Enterprise, Inc.

Headquartered in E. Norwalk, Connecticut, Wilks Enterprise specializes in easy-to-use, portable mid-infrared analyzers for specific measurement applications. All Wilks analyzers have been specifically designed for on-site use by non-technical personnel and are used for a wide variety of applications in the biofuels, environmental, petrochemical, quality control, and manufacturing industries. These portable analyzers enable analytical measurements to be made in the field, helping to eliminate the wait for off-site lab results.
