

## **NEWS RELEASE – FOR IMMEDIATE RELEASE**

### **On-Site Measurement of Oil in Water and Soil using Portable Infrared Analyzers Provides Field-Proven Methodology to Assist with Gulf of Mexico Oil Spill**

East Norwalk, CT, June 7, 2010 -- InfraCal TOG/TPH Analyzers, manufactured by Wilks Enterprise, Inc., provide field-proven methodology to assist with the clean-up of the oil spill in the Gulf of Mexico. The InfraCal Analyzers are currently used by numerous oil companies worldwide on offshore oil platforms and in refineries for easy, on-site infrared measurement of oil in water, wastewater, and soil. Total oil and grease (TOG) and total petroleum hydrocarbon (TPH) concentration levels can be measured in 10-15 minutes which eliminates the need to wait for off-site results. The InfraCal Analyzers are ideal for use by non-technical personnel.

InfraCal TOG/TPH Analyzer models are available for use with a wide variety of extracting solvents such as hexane, pentane, Vertrel MCA, hydrocarbon-free grade of perchloroethylene, S-316 or AK-225. All InfraCal Analyzers are portable (operable from a 12 volt dc power supply) and weigh less than 5 lbs. Their compact, rugged design has no moving parts requiring alignment or adjustment and pushbutton, user-friendly operation makes them easy to use with minimal training. The analyzers can read out in infrared absorption values or they can be calibrated to display concentrations directly in any desired format such as part per million (ppm) or milligram/kg. A wide range of accessories, such as printer and carrying case increase the versatility and capabilities of the InfraCal TOG/TPH Analyzers.

For further information on the InfraCal TOG/TPH Analyzers for on-site oil in water and soil measurements, please contact: Wilks Enterprise, Inc., 25 Van Zant Street, Ste. 8F, E. Norwalk, CT 06855 TEL: 203-855-9136; FAX: 203-838-9868; Email: [info@wilksir.com](mailto:info@wilksir.com); or the information can be downloaded from the Wilks website: [www.WilksIR.com](http://www.WilksIR.com)

#### **About Wilks Enterprise, Inc.**

Headquartered in E. Norwalk, Connecticut, Wilks Enterprise specializes in easy-to-use, portable mid-infrared analyzers for specific measurement applications. All Wilks analyzers have been specifically designed for on-site use by non-technical personnel and are used for a wide variety of applications in the biofuels, environmental, petrochemical, quality control, and manufacturing industries. These portable analyzers enable analytical measurements to be made in the field, helping to eliminate the wait for off-site lab results.
