NEWS RELEASE – FOR IMMEDIATE RELEASE

Accurate, On-Site Measurement of Percent Biodiesel in Diesel Fuel in Under One Minute

East Norwalk, CT, April 29, 2010 -- Current tax incentives and government regulations are based on % biofuels. Therefore, it is important to have easy-to-use measurement systems to ensure proper blend ratios. With the portable InfraCal Biodiesel Blend Analyzer, from Wilks Enterprise, accurate blend ratio measurements can be obtained in under a minute.

The InfraCal Biodiesel Blend Analyzer is rugged, compact, and easy to use by fleet managers, distributors, or regulators. It reads out directly in % biodiesel and provides the user with the capability to quickly measure the blend ratio on-site. Its measurement range is 0 to 100% with an accuracy of +/- 0.20 % and can be operated by personnel having little or no knowledge of infrared analytical techniques.

The InfraCal Analyzer is a fixed filter infrared instrument that, unlike an FTIR spectrometer, has no moving parts and an insignificant optical air path. This makes it portable, rugged and ideal for use in a field environment. It weighs less than 5 lbs. and can be operated from a battery pack or a cigarette lighter adapter cable. An internal calibration table allows the InfraCal Analyzer to provide a digital readout directly in % biodiesel.

For further information on the InfraCal Biodiesel Blend Analyzer for measuring blend ratio, please contact: Wilks Enterprise, Inc., 25 Van Zant Street Ste. 8F, E. Norwalk, CT 06855 USA, TEL: 203-855-9136, FAX: 203-838-9868, Email: info@wilksir.com, Web Site -- www.wilksir.com.

About Wilks Enterprise, Inc.

Headquartered in E. Norwalk, Connecticut, Wilks Enterprise specializes in easy-to-use, portable mid-infrared analyzers for specific measurement applications. All Wilks analyzers have been specifically designed for on-site use by non-technical personnel and are used for a wide variety of applications in the biofuels, environmental, petrochemical, quality control, and manufacturing industries. These portable analyzers enable analytical measurements to be made in the field, helping to eliminate the wait for off-site lab results.
